

## Sanitized®

Stands for comprehensive odor management in textiles and shoes. The Sanitized® hygiene function protects plastics, surfaces and mattresses from the formation of fungi and algae, reduces dust mites and odors. Sanitized® products can be durably incorporated into the article during various steps in the textile or polymer manufacturing process to obtain permanent protection.

Sanitized® is used in various application fields:

- Plastics | Polymers
- Technical applications
- Clothing and shoes
- Healthcare
- Flooring
- Mattresses and bedding
- Living
- Kitchen
- Work
- Public transportation
- Food industry
